

Right Product - Right Place Selector Guide

HUB Surface Systems is the Canadian representative of premium, high performance decorative pavement and traffic safety treatments. No matter what your hardscape or roadway requirements are we have a solution that will provide years of safe, durable service.

All products on the chart below have extensive history for use in Canadian Roadways and Hardscapes. This chart is intended to indicate recommended application types for each product based on extensive past performance history of their use on Canadian roadways and hardscapes.

This chart does not represent either warranty or guarantee in any way. Many factors can affect product performance in roadways and exterior hardscapes. It is intended only as a recommendation guideline based on historically satisfactory product performance.

	Roadways				Parking Lots				Pedestrian Areas				Residential			
	Laneway	Local Road	Collector Road	Roundabout Aprons	Gore Points & Medians	Feature & Entrance Areas	Pedestrian Channelization	Traffic Calming Areas	Horizontal Wayfinding	Priority Parking Stalls	Playgrounds	Splashpads	Park Paths & Sidewalks	Plazas & Community Spaces	Multi Residential Hardscapes	Residential Driveways
